INTOUCHPOS® GOES MOBILE!

March 3, 2008, Walnut Creek, CA ---- InTouchPOS® Offers Mobility with Wireless Handhelds.

ASSAL Corporation has just finished testing their new Wireless Handheld Terminals. They are available to Customers when they purchase the InTouchPOS® Restaurant Point of Sale and Management System. Wireless handheld terminals give restaurant staff the mobility to take orders quickly and efficiently. The InTouchPOS® handheld provides Servers with the same functionality as a regular InTouchPOS® Station, but can easily be carried with one hand.

Dean Kashefi, Director of Sales notes that, "ASSAL Corporation wanted to wait for this technology to become stable before offering it to our Customers. It was worth it, because we can now offer reliable Mobile Terminals with the same functionality as our fixed terminals. Our Customers can also perform Management functions on the Wireless Handheld Terminal, which allows them to stay connected to their Back of the House anywhere in the restaurant."

ASSAL Corporation is one of the leading providers of Point of Sale Systems for the Restaurant and Hospitality industry. Since 1988 ASSAL has been providing a complete solution, including Software, Hardware, System Setup and Configuration, Installation, On site Training, and 24/7/365 Hardware and Software Support Services. Their products and services are uniquely flexible and can be customized to meet the specific needs of any restaurant.

InTouchPOS® is a turn-key Point-of-Sale system with Windows 2003® Server Technology. Providing restaurants with single to multi-station systems, InTouchPOS® is capable of supporting unlimited users.
